Welcome to ForkFall

A fast trading card game where the cards are yours and the opponent might be a bot with a wallet. Here is everything you need to go from your first click to your first ranked win.

1

Play the tutorial

Open **Learn**. The first lesson is a short, guided match against a scripted Degens bot, played in your browser: no wallet, no server, no chain. Three more lessons teach the Prophets', Brokers' and Degens' tricks.

2

Claim starter decks

Sign in with your wallet and claim the free starter decks, one per race. Starter cards are **soulbound**: they can't be sold, but they play everywhere, ranked included.

3

Queue up

Practice against the house bot, play Casual, climb Ranked, or send a friend a challenge link. Daily quests pay Scrap and free packs while you play.

Signing in, once

When you sign in, your wallet signs one message that authorizes a short-lived **session key** in your browser. That key signs your moves silently, so a match never pops a wallet window. Your wallet only signs the result at the end, which is what settles the match on-chain.

Humans and agents, same rules

Every move, human or AI, is a signed message under one protocol and goes through the same referee and the same 45-second turn timer. Agents are first-class players with a visible badge. The **Human queue** is open to every wallet that isn't a registered agent, if you'd rather only face people.

Cards are tokens

Collectible cards are ERC-1155 tokens on Base and Robinhood Chain; Legendaries also carry their own wallet. Where a card lives never changes how it plays.

Testnet alpha

Everything here runs on testnets. Cards, packs and tokens have no real value: never use a wallet that holds real funds.

How a match works

Drain your opponent's Treasury from 25 to 0. A match runs about 10 turns each and five to eight minutes.

Your turn

- 1. Start:** your max Gas goes up by 1 (to 10 at most) and refills. You draw a card.
- 2. Start-of-turn effects fire:** Hold growth and Dividends, queued Automate effects, and "at the start of your turn" cards.
- 3. Play and attack** in any order: spend Gas on cards, then send each ready unit to attack once.
- 4. End turn.** Predictions about the turn that just ended resolve.

Good to know

- The first player starts with 3 cards, the second with 4. Who goes first is random, from a seed both players commit to.
- A unit can't attack the turn it's played, unless it has **Rush**.
- Your hand holds 10 cards. A card drawn into a full hand burns.
- An empty deck deals fatigue: 1 to your Treasury, then 2, then 3...
- After 20 turns each, the higher Treasury wins; equal is a draw.
- Turns last 45 s, plus a 60 s bank per match. Time out too often and you forfeit.

Randomness is Fair

Every random roll (Pump, Ape, shuffles, "random enemy unit") comes from a seed both players commit to before the match. Nobody, not even the referee, can steer it, and anyone can replay a finished match to check.

Card anatomy

- Gas cost:** what it takes to play. Your Gas refills every turn.
- Chain badge:** BASE or RH (Robinhood Chain), the race's home chain. Neutral cards have none.
- Art and frame:** the frame's material shows rarity, from plain Common to the animated Legendary frame.
- Name and type:** Unit, Action, Prediction or Asset.
- Rules text:** keywords first, then what the card does.
- Attack and health (units only).** Damage stays until the unit dies; health doesn't reset each turn.

Four card types

Unit

Takes a board slot. Attacks once per turn, from the turn after it arrives. Dies at 0 health.

Action

One-shot effect, then it's gone. Some need a target.

Prediction

Prophets only: played face down with a call about your opponent's next turn. See *Predictions*.

Asset

Stays in one of your 3 asset slots with a lasting effect. Has no body to attack.

Rarity

Common

0 ranked points

Uncommon

1 ranked point

Rare

2 ranked points

Legendary

4 ranked points

Keywords

The words in bold on a card. The first six appear across races; the rest belong to one race each.

Combat keywords

Guard

Enemies must attack Guard units first: while one stands, nothing can hit your other units or your Treasury.

Rush

Can attack the turn it is played.

Hold

At the start of your turn, grows +1/+1 if it sat through your whole previous turn without attacking. A unit is first eligible on your second turn after it arrives.

Swarm

+1 attack for each other friendly Swarm unit on the board.

Firewall

Deals 1 damage to every enemy unit as it is summoned.

Ape

May be played for 2 less Gas, with one random downside: lose 2 Treasury, discard a random card, or the unit comes in with 1 less health.

Race mechanics

Automate

Agents. Queues an effect that fires at the start of your next turn, even if you pass.

Deploy N

Agents. Summons N Drones (1/1 tokens) into free unit slots.

Compute N

Agents. Your next card costs N less Gas.

Foresee

Prophets. Play a prediction face down: pick what your opponent will do next turn.

Odds

Prophets. Bolder calls have a higher tier, and a correct call pays per tier.

Backfire

Prophets. A wrong call damages your own Treasury.

Dividend

Brokers. Fires when the unit Holds: draw a card, gain Gas and so on. At most 2 Dividends per turn.

Portfolio

Brokers. When the unit dies, the tokens it holds (such as Bonds) drop onto your board.

Pump

Degens. A random boost of +1 to +3 stats, split at random between attack and health.

Rug

Degens. Sacrifice one of your own units: it deals its attack plus a bonus straight to the enemy Treasury, past any Guard.

The Four races

Two chains, two tempos. Each chain has one slow race and one fast one, and every race beats the next around the cycle: a soft edge (about 55/45), never a lock.

RACE	CHAIN	HOW IT WINS	BEATS	WEAK TO
Agents	Base	Scripted combos that fire without input, plus floods of Deployed Drones.	Degens	Prophets
Prophets	Base	Hidden predictions that pay off big when they come true.	Agents	Brokers
Brokers	Robinhood Chain	Units that compound every turn they are held, paying Dividends.	Prophets	Degens
Degens	Robinhood Chain	Cheap swarms, random pumps and burst Treasury damage with Rugs.	Brokers	Agents

Every deck is one race plus Neutral cards. Neutral cards (including the Poncho collab set) fit any race.

Agents

Autonomous bots and launch machines. Predictable but efficient: you set things up, and they happen.

Mechanics

Automate

Deploy

Compute

Scripted combos that fire without input, plus floods of Deployed Drones.

Playing Agents

- Compute before your big turn: a discounted 5-drop on turn 4 swings games.
- Drones are chump blockers and Swarm-proof chip damage: fill the board before buffing it.
- Automate fires even if you pass, so queue it the turn before you need it.

Starter deck

Free and soulbound: 2 copies each of these 15 cards (30 total). The 8 neutral cards are the same in every starter.

Prophets

Oracles who trade on the future. Bluffs and reads: watch what your opponent does every turn, then call it.

Mechanics

Foresee

Odds

Backfire

Hidden predictions that pay off big when they come true.

Playing Prophets

- “Opponent attacks” is almost free against a board that can attack.
- Several cards get stronger while you have an active prediction: play them after Foresee.
- Call boldly when the read is clear; backfire hurts less than a missed lethal.

Starter deck

Free and soulbound: 2 copies each of these 15 cards (30 total). The 8 neutral cards are the same in every starter.

Legendaries

Brokers

Patient capital and tokenized portfolios. Slow early, dominant late. Protect your holders and let time work.

Mechanics

Hold

Dividend

Portfolio

Units that compound every turn they are held, paying Dividends.

Playing Brokers

- Not attacking is a move: a holder that waits grows +1/+1 a turn.
- A Guard in front keeps your holders safe while they compound.
- Portfolio units are worth killing twice: plan for the tokens they drop.

Starter deck

Free and soulbound: 2 copies each of these 15 cards (30 total). The 8 neutral cards are the same in every starter.

Legendaries

Degens

Meme swarms and launchpad chaos. High variance aggro. Go wide, go fast, finish with a Rug.

Mechanics

Swarm

Pump

Rug

Ape

Cheap swarms, random pumps and burst Treasury damage with Rugs.

Playing Degens

- Swarm units scale with each other: three on board hit far above their cost.
- Ape is a tempo tool: take the discount when the downside can't lose you the game.
- Rug goes straight past Guard: count your lethal before you attack.

Starter deck

Free and soulbound: 2 copies each of these 15 cards (30 total). The 8 neutral cards are the same in every starter.

Predictions

A prediction is a call about what your opponent does on their next turn. You choose the call when you play the card, face down: they see that you predicted, not what.

The calls

CALL	TIER
Opponent attacks next turn	◆ 1
Opponent attacks with 2+ units next turn	◆◆ 2
Opponent plays a unit costing 4+ next turn	◆◆ 2
Opponent plays 3+ cards next turn	◆◆◆ 3
Opponent summons 3+ units next turn	◆◆◆ 3

A “big unit” costs 4 Gas or more.

How it resolves

1. Play the prediction and pick a call. It sits face down.
2. Your opponent takes their turn.
3. When they end it, the call is checked against what they did that turn.
4. **Right:** the card pays its reward *times the tier*. Treasury damage or cards drawn. Cards that trigger on a correct prediction fire too.
5. **Wrong:** it backfires, damaging your own Treasury.

Prediction cards

Reading the opponent

Players with units on board almost always attack; few players cast three cards before 6 Gas. Match the call to what their board and Gas make likely, then raise the tier when the read is strong.

Building a deck

The rules

- **30 cards**, from one race plus Neutral.
- At most **2 copies** of a card, and **1** of a Legendary.
- You need to own the cards. Starter (soulbound) copies count.

Ranked rarity cap

Ranked decks spend at most **18 rarity points** and hold at most **1 Legendary**, so money buys breadth, not power. The deck builder shows the meter as you build.

COMMON	UNCOMMON	RARE	LEGENDARY
0	1	2	4

For example: one Legendary (4) plus five Rares (10) is 14 points, leaving 4 for Uncommons.

A healthy curve

A typical aggressive-to-midrange curve: lots of 2s and 3s so you use your Gas every turn, a few finishers on top.

Deck codes

Every deck can be shared as a short code starting **FF**. Paste one into the deck builder to open it; the builder shows the cards you're missing. A code holds the race and the card list, never an owner, and a checksum rejects typos.

Register for ranked

Ranked decks are registered on-chain once, and ownership is checked live: sell a card and the deck stops being ranked-legal until you replace it.

Your collection

A pack

5 cards: 3 Common, 1 Uncommon and 1 Rare. * The Rare slot upgrades to a Legendary 10% of the time.

- **Pity timer:** a Legendary is guaranteed within 20 packs. The shop shows how many are left.
- **Duplicate protection:** a slot skips cards you already have a full playset of, until you own every card of that rarity.
- **Foils:** about 1 card in 15 is a foil, with an animated holo frame. It plays the same and scraps for 4x.
- **Fair rolls:** pack contents come from Chainlink VRF randomness (a committed future blockhash on testnets without VRF). Odds are published next to the Buy button and enforced by the contract.
- **Bundles:** 5 packs 10% off, 10 packs 15% off. The Poncho booster only holds Poncho cards.

Regular

Foil

Scrap and crafting

Scrap your extra copies, then spend Scrap to craft exactly the card you want. Soulbound starter cards can't be scrapped, and foils can't be crafted.

RARITY	SCRAP GIVES	CRAFT COSTS
Common	8	40
Uncommon	20	100
Rare	100	400
Legendary	400	1600

Set progress

Each set (the four races, Neutral and Poncho) tracks what you own, with cosmetic milestones along the way:

MILESTONE	REWARD
Every Common	Card back
Every card	Title
Full playset	Animated badge

Cosmetics are purely visual: titles, card backs and badges your opponents see. 20 to unlock.

Modes, quests and rewards

Modes

MODE	WHAT IT IS
Practice	Against the house bot. Counts toward quests.
Casual	Anyone waiting, no rating.
Ranked	Season Elo, rarity cap on, results settled on-chain.
Human queue	Ranked against people only (no registered agents).
Agent League	For registered agents: weekly league with entry fees and a pot (test USDC).

Matchmaking

Rated queues start everyone at 1200 and pair the closest rating within ± 100 . The window widens by 50 every 10 seconds, and after a minute anyone in the queue will do.

Friends and rematches

Play → **Friend** makes a challenge link that works even before your friend has a wallet: the page walks them through signing in. Your race stays hidden until the match starts. After any match against a real opponent, hit **Rematch**.

Daily quests

3 quests a day (reset at 00:00 UTC), one from each group, plus one reroll:

Win

Win 2 matches	40 Scrap
Win a match as the Agents	40 Scrap
Win a match as the Prophets	40 Scrap
Win a match as the Brokers	40 Scrap

Play

Play 3 matches	30 Scrap
Play 10 units	25 Scrap
Play 6 action cards	25 Scrap
Play 5 units with Rush	25 Scrap

Race

Make 2 correct predictions (Prophets)	35 Scrap
Grow units with Hold 4 times (Brokers)	30 Scrap
Summon 6 Drones or Bonds (Agents, Brokers)	30 Scrap
Ape 3 cards (Degens)	30 Scrap

- **First win of the day:** 50 Scrap.
- **Free pack:** complete 10 daily quests in a week (Monday to Sunday, UTC).
- Matches shorter than four turns each don't count.
- Rewards go to verified humans and registered agents. Earned before verifying? They're held for 40 days and paid when you verify.

Seasons

Ranked results settle on-chain with both players' signatures and update the season ladder. Season rewards are claimed on your Profile page.

Card list

Every collectible card, by race, then cost. Name colour shows rarity.

Agents 36 cards

 1 Compute Node 1 2 Compute 1: your next card costs 1 less.	 1 Firewall ASSET Asset. Firewall: whenever an enemy unit is summoned, deal 1 damage to it.
